

Presentation market – Results of the workshops and school visits by Conny Miksch

The presentation market took place on Friday morning. It was divided into two parts:

First, the workshop conclusions and the results from the school visits were presented and discussed. The participants got an overview of what has happened during the week and they had the possibility to ask others about their personal views and conclusions.

In the second part all participants had the chance to present their country and their work. In that way the participants got an impression on how *Productive Learning* is developed around Europe.
